The horrific, unprovoked attack by Hamas terrorists on October 7 brought massive devastation, destruction and death to more than 1,400 innocent people, and more than 200 Israelis are still being held hostage in Gaza. **The people of Israel are fighting for the safety and security of our Jewish homeland, nothing less.**

**It is important to know that the Jewish people are not alone right now and that we have the support of all people of good will, and — in particular — the men and women who represent us.**

Please join our four South Florida Federations and other Jewish community organizations for an opportunity to hear firsthand from our communities' elected officials at this critical moment. We have invited all members of our Congressional delegation to join us for this special Town Hall Meeting to share their thoughts and feelings on the unfolding conflict and the critical role that the United States plays in support of Israel's quest for the eradication of terror and the release of the hostages.

This is a program you will not want to miss.
